Okay. Thanks, Allison. I thought I might have been missing the basis for why we needed an EP&M policy (which is on the NOAA side). Thanks for tracking it down, and I recall you (and probably John Kuriawa) mentioning this in the distant past, but it's been a while. This is a great/critical addition, so I moved the statutory language from your comment to the narrative itself. I made a few other minor tweaks, also. See attached.

Also, you made an interesting comment on the probable need to run any guidance revisions out for public comment. I don't disagree. Given that the revisions would need to be finalized before Jan. 2015, I think that's a death knell for Option 3. Sigh.

Don--

Overall, I think this issue paper looks good. I looked at the CNP programmatic guidance again to refresh myself on what it said on EP&M. I was reminded where the EP&M requirement comes from---it is a specific statutory requirement that CNPs include EP&M. While CZARA doesn't say anything about EP&M specifically, the CZMA does. Not only does it define "enforceable policies" which I mentioned yesterday but Sect.306(d)(16) also requires all state coastal mngt programs to include EP&M to implement their coastal nonpoint programs. Therefore, I believe it's pretty clear we can't ignore the EP&M requirement for CZARA.

If you agree those are the key questions, it may be helpful to list those in the issue paper. I think the 3 options you lay out get at those issues but sometimes it's helpful to have the main questions we need to answer right up front as well.

I want to give her a bit more time to comment on other aspects of the draft OSDS issue paper.

I like your changes. No further comments from me.

Let me know when you consider the paper final so we can pass on to management and legal. I will be sending the issue papers to management and legal as we complete them and then consolidate them all in the meeting reminder.
